DETAILED ACTION

1. Claims 1-18 have been examined.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 1-18 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 4. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. Although some of the claims may be understandable, applicant is advised to use commonly used terms to clearly convey the inventive steps and define the proper scope of the claims.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 2431

6. Claims 1-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Hofmeister et al. U.S. Pub. No. 20040078565 (hereinafter Hofmeister).

- 7. As per claim 1, Hofmeister discloses a secure device comprising: an authentication section that performs authentication processing for a gate equipment (Hofmeister: [0020]); a terminal application installed at a terminal (Hofmeister: [0020]: for installing or executing application on mobile device); and a control section that installs the terminal application designated by the gate equipment on the terminal in the event that authentication between the authentication section and the gate equipment is successful (Hofmeister: [0021]).
- 8. As per claim 2, Hofmeister discloses the secure device of claim 1. Hofmeister further discloses wherein the secure device holds correspondence information defining a corresponding relationship of the gate equipment and the terminal application, and the control section installs the terminal application at the terminal only in the event that the relationship of the terminal application designated by the gate equipment and the gate equipment matches with the corresponding information (Hofmeister: [0022]-[0024]).
- 9. As per claim 3, Hofmeister discloses the secure device of claim 1. Hofmeister further discloses wherein the control section provides the terminal application installed at or deleted from the terminal according to the communication scheme with the gate equipment (Hofmeister: [0025]-[0027]).

Art Unit: 2431

10. As per claim 4, Hofmeister discloses the secure device of claim 1. Hoftmeister further discloses a terminal setting management section that determines whether or not a setting to valid for the previous time with the terminal has been correctly invalidated while the authentication section is carrying out authentication with the gate equipment, and permitting authentication with the gate equipment only in the event of correct invalidation (Hoftmeister: [0025]-[0027]).

11. As per claims 5-18, claims 5-18 encompass same or similar scope as claims 1-4. Therefore, claims 5-18 are rejected based on the same rationale as provided above in rejecting claims 1-4.

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Matsumoto et al. U.S. Pub. No. 20020066042 discloses card settlement method and system using mobile information terminal.

McClain U.S. Pub. No. 20040097217 discloses method for providing authentication and authorization utilizing a personal wireless communication device.

Chen et al. U.S. Pat. No. 6496979 discloses method for managing application installation for a mobile device.

DeTreville U.S. Pub. No. 20040015694 discloses method for authenticating an open system application to a portable IC device.

Merrill et al. U.S. Pub. No. 20040002943 discloses method for application delivery and configuration management of mobile devices.

Art Unit: 2431

Huang U.S. Pub. No. 20030181219 discloses method of indicating unauthorized use of a mobile terminal.

Osthoff et al. U.S. Pat. No. 7558953 discloses loading data into a mobile terminal.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHIN-HON CHEN whose telephone number is (571)272-3789. The examiner can normally be reached on Monday through Friday 8:30am to 5:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, William R. Korzuch can be reached on (571) 272-7589. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
